About the Company:

From the beginning, New Star was created upon one single purpose; to offer uniqueness for individuals. To create greatness, we must find a difference in what we do. That's exactly what we have been doing for the past 16 years by studying the market and filling the gaps by providing our consumers with the newest products that are nowhere else! Here at New Star, we are firm believers that innovation and outstanding after sale services are the key to long term success. The start of it all, in 2006 we were the first to introduce Egyptians to Pellet chips. We are the creators of the well-known powdered juice named Source and it's been in the market since 2010 with 18 exceptional flavors. In 2015, we became the only providing agent of Arzum Okka in Egypt which specializes in Turkish coffee machines. Arzum Okka has firmly established itself as the dominant force in the Egyptian market for Turkish coffee machines.

Additionally in 2018, we proudly became the sole providers of Arzum's range of small home appliances in Egypt to this day.
